

Day 4 Task — Restaurant Ordering System

Continue your Restaurant Ordering System from the previous days.

Requirements

Create a form with:

Username

Password

Phone Number

Order

Use Regular Expressions (Regex) to validate:

Username: must not be empty and must not contain spaces.

Password: at least 8 characters and contains at least one number.

Phone: exactly 10 digits and starts with 07.

After successful validation:

Display Welcome, [username].

Use Local Storage:

Save the selected Order in Local Storage.

Display the saved order on the page.

Use Session Storage:

Save the Username in Session Storage.

Display the saved username on the page.

Example

If the user enters:

Username: Anfal

Password: Anfal1234

Phone: 0791234567

Order: Burger

Display:

Welcome, Anfal

Saved Order: Burger

Saved Username: Anfal
